# SEO Improvement Proposal

## The Strictly Elvis Show

**Prepared by:** Mark McArthey — LearnedGeek.com
**Prepared for:** Alan Graveen
**Website reviewed:** https://thestrictlyelvisshow.com
**Date of scan:** March 17, 2026

## Overview

This proposal is based on a technical SEO scan of **https://thestrictlyelvisshow.com** conducted on March 17, 2026. The findings below are specific to your website and represent concrete opportunities to improve your visibility in local search results.

3 high-impact, 5 medium-impact, and 0 low-impact item(s) identified.

- **Google Business Profile:** Found ☑ (7 reviews, avg 5/5.0, 10 photos)

## What's Already Working

- Meta description is present and properly sized
- Structured data is present (LocalBusiness)
- Phone number is visible on the page
- Google Business Profile has 10 photos
- Business hours are set on the Google Business Profile

## Findings

The following issues were identified during the scan, organized by potential impact on your search rankings and local visibility.

### 🔘 Title Tag — High Impact

**Finding:** Title is too long (65 chars; aim for 50–60)

### 🔘 NAP Consistency (Website) — High Impact

**Finding:** No street address detected — displaying your address consistently is critical for local search rankings (NAP consistency)

### 🔘 Google Business Profile — High Impact

**Finding:** Phone number mismatch — website shows a different number than the Google Business Profile ((262) 293-9805). Inconsistent NAP data confuses search engines and can suppress rankings

### 🟡 Google Business Profile — Medium Impact

**Finding:** Only 7 Google review(s) — businesses with 10+ reviews see significantly better local pack visibility

**Finding:** No business description on the Google Business Profile — a well-written description with relevant keywords improves both rankings and conversions

### 🟡 Heading Structure — Medium Impact

**Finding:** Multiple H1 tags found (2) — use only one per page

### 🟡 Canonical Tags — Medium Impact

**Finding:** No canonical tag found — without it, Google may index duplicate versions of your pages and split your ranking authority

### 🟡 Image Optimization — Medium Impact

**Finding:** 6 images missing alt text — alt text helps search engines understand your images

---

## Suggested Scope of Work

Based on the findings above, here is a summary of recommended improvements:

- Rewrite and optimize page title tags with geographic keywords
- Ensure Name, Address, and Phone appear consistently site-wide
- Restructure page headings for proper H1/H2 hierarchy
- Add descriptive alt text to all images
- Add canonical tags to prevent duplicate content issues
- Audit and optimize Google Business Profile listing
- Write keyword-rich Google Business Profile description
- Implement a review generation strategy for Google

---

## Next Steps

I'd welcome the opportunity to walk through these findings with you in person and discuss which improvements would have the biggest impact for your business. There's no obligation — I'd rather you walk away with a clear picture of where things stand than feel pressured into anything.
